Sustainable Ironmaking

NEWS RELEASE

MARITIME IRON HOSTING SUPPLY CHAIN INFORMATIONAL WEBINARS

May 14, 2020, Toronto - Maritime Iron Inc. in partnership with local Chambers of Commerce is pleased to announce the launch of supply chain information sessions across New Brunswick.

Maritime Iron is investing \$1.5 Billion in Belledune, New Brunswick to build one of the world's most innovative and environmentally responsible iron processing facilities. With nearby port access, a highly skilled labour force, and an adjacent generating station, New Brunswick is ideally suited for this facility.

Maritime Iron is partnering with local chambers to discuss the opportunities that exist for businesses and to learn about the project and the significant supply chain that exists for New Brunswick companies and suppliers.

Maritime Iron's Chief Operating Officer and Project Director, Rinaldo Stefan said, "The information sessions will focus on the many supply chain opportunities that exist for New Brunswick companies and suppliers. Our objective is to raise awareness of the project and provide information so that businesses can plan for these opportunities."

Maritime Iron is interested in identifying and engaging with many types of companies including contractors and suppliers for:

- Heavy equipment services
- Construction and maintenance services
- Engineering and technical services
- Health, safety, environmental & training services
- Site services
- Material supplies
- Human resource and IT services

New Brunswick stands to gain 3,300 direct, indirect and induced jobs during the 3 years of construction. A further 400 direct, indirect and induced jobs will be created during the 30+ years of operations.

These webinars are free and open to members and non-members of Chambers across the province.

Moncton Region – Thursday, May 14 from 11:00 AM – 12:00 PM – Click [HERE](#) to register.

About Maritime Iron Inc.

Maritime Iron Inc. is a privately-owned Canadian development company advancing an environmentally responsible merchant pig iron production facility in Belledune, New Brunswick, Canada. Maritime Iron's project will produce approximately 1.5 million tonnes annually, of high-quality pig iron for sale to steel mills and foundries in North America and Europe. The project will integrate with the local power generating station, significantly lowering the environmental footprint of both facilities when in full production.

For more information about the project please visit our website at www.maritimeiron.com
